

Vacuum glass lifter

Model VA2 RCMBP

AIR Power supply
Compressed Air

The model VA2 RCMBP is a glass vacuum lifter specific for **indoor use**, with two suction pads d. 310 mm, compressed air powered and a lifting capacity up to 200Kg. The pads are repositionable along the beam according to needs. The standard central beam is 1500mm long, but different lengths are available on request.

Thanks to its pneumatic cylinder, this lifter features **powered 0 – 90° tilt** controlled by joystick, which is placed on the lifter's handle. It also has **manual 360° rotation** with automatic locking each 90°.

It is equipped with an **audio-visual alarm** unit that warns the operator of any possible dangerous situations. The vacuum gauge with coloured scale allows constant control of the vacuum level reached. Moreover, it features a **filtering system** for dust and condensation.

Technical specification

Application	Glass panels
Lifting capacity	Max 200 kg
Suction pads	No. 2 round suction pads diameter 310 mm Lipped suction pads with safety ring
Pads spread	810 x 310 1660 x 310
Load movement	360° manual rotation, with possibility of automatic locking each 90° Pneumatic 90° tilt, controlled by joystick
Operating system	Compressed air
Vacuum system	Single vacuum circuit with vacuum reserve and non-return valve
Weight of lifter	Kg 76
Control	Manual on-off valve on the lifter's frame Release of the load by dual action security command
Standard features	Audible and visual low vacuum warning devices Vacuum gauge, Vacuum filter, Adjustable pads position

Indoor use

Safety devices

Pneumatic tilt 90°

Manual rotation 360°
