

Vacuum glass lifter

Model

VA2 RP

The model VA2 RP is a **vacuum glass lifter specific for indoor use**, with two suction pads d. 390 mm, compressed air powered with lifting capacity up to 200Kg.

The lifter features **a vertically fixed frame combined with a 90° pneumatic rotation**. The rotation is performed with the aid of a pneumatic cylinder and is controlled via the joystick on the lifter's frame.

It is equipped with an audio-visual alarm unit that warns the operator of possible dangerous situations. The vacuum gauge with coloured scale allows constant control of the vacuum level reached. It features a **filtering system** for dust and condensation.

90° pneumatic rotation

Safety devices

4 suction pads

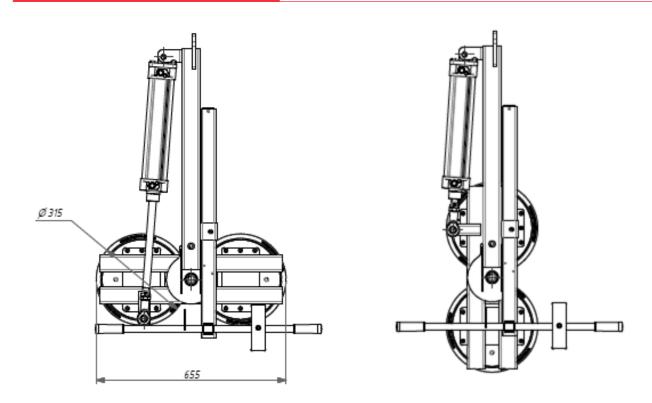

Ideal for processing use

Vacuum glass lifter

Technical drawings

Technical specification

Application	Glass panels
Lifting capacity	Max 200 kg
Suction pads	No. 2 round suction pads specific for glass
	Lipped pads with safety ring
Pad spread	655 x 315 mm
Load movement	90° pneumatic rotation
Operating system	Compressed air
Vacuum system	Single vacuum circuit with vacuum reserve and non return valve
Weight of lifter	Kg 58
Control	Manual on off valve on the lifter's frame
	Release of the load by dual action security command
	Joystick for rotation control
Standard features	Audible and visual low vacuum warning devices
	Vacuum gauge
	Vacuum filter
	Adjustable pads position
