

The Vacuum Lifter for sheet metal F10EB is a model with **electric operating system** 400V three-phase or 220V single-phase. The model F10EB 2000 has a maximum capacity of 2000 kg, it has a cross-beam which can be made with different lengths, on standard models L3000 mm, L4000 mm or L5000mm and it has 10 suction pads distributed on 5 arms. The pads, equipped with springs, are specific for sheet metal made in **special oil-resistant vulcanized rubber**.

The adjustment of the position of the plates and arms, together with the possibility of **using only the central pads**, allows to adapt the lifter to the different formats of the metal sheets to be lifted. The F10EB 2000 model has a steel reinforced structure and a horizontal fixed frame.

Technical specification

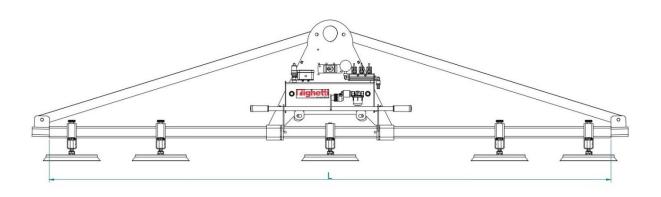

Application	Metal sheet, stainless steel, aluminum, plastic panels	
Lifting capacity	2000 Kg	
Suction pads	Nr. 10 vacuum pads d. 310 mm	
Frame	Steel frame structure fixed in horizontal position	
	Lowered below the hook height	
	The suction pads are distributed on cross arms	
	Adjustable position of suction pads and of cross arms	
Operating system	Electric 400V 3 phase 50Hz or 220V 1 phase 50Hz	
Vacuum system	Vacuum circuit with vacuum reservoir, non-return valve, vacuum filter	made ir
Safety systems	Vacuum gauge with colored scale	ΙΤΛΙΝ
	Audio visual low vacuum waring powered independently and with back up battery	IIALY
Weight of lifter	Depends on the configuration	
Command	Suction and release by slide valve command with safety system	

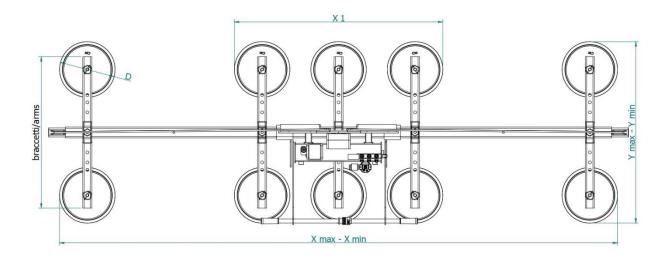

SHEET METAL division

Vacuum lifter
