## Series

## FS4A 250

The Vacuum Lifter for sheets metal FS4A 250 is a model with compressed air operating system and requires connection to the pneumatic system. The model FS4A 250 has a maximum capacity of 250 kg and 4 suction pads distributed on 2 cross-arms. The pads, equipped with springs, are made of special oil-resistant vulcanized rubber, specific for sheet metal.

Adjusting the position of the pads and arms allows you to adapt the vacuum lifter to the different sizes and shapes of the sheets metal. The FS4A 500 model has a steel reinforced supporting structure and a horizontal fixed frame.

A special feature of the FS4 model is its lowered structure which significantly reduces the height below the hook. The Vacuum Lifter FS4 is particularly suitable for loading sheet metal on laser cutting.

| ( Horizontal lifting | - 4 suction pads d. 200 mm | For standard sizes: $3 \times 1,5 \mathrm{~m}$ |
| :---: | :---: | :---: |
| - Safety devices | - Capacity 250 Kg | $4 \times 2 \mathrm{~m}$ X |
| - Lowered structure | Available also with 6 pads - capacity 500 kg | $6 \times 2,5 \mathrm{~m}$ |

## Technical specification

| Application | Metal sheet, stainless steel, aluminium, plastic panels |
| :--- | :--- |
| Lifting capacity | 250 kg |
| Suction pads | Nr.4 suction pads in vulcanized rubber, diameter 200 mm <br> Suction pads with spring supports <br> Exclusion of suction pads by cross arm |
| Frame | Steel frame structure fixed in horizontal position <br> Lowered below the hook high <br> The suction pads are distributed on cross arms <br> Adjustable position of suction pads and of cross arms |
| Operating system | Compressed air |
| Vacuum system | Vacuum circuit with vacuum reservoir, non-return valve, vacuum filter <br> Vacuum gauge with colored scale <br> Audio visual low vacuum waring powered independently and with back up battery |
| Weight of lifter | 52 Kg |
| Command | Suction and release by slide valve command with safety system |
